

JOB 040694
ALMA VIRTUAL WEIGH STATION INSTALLATION (S)
MARCH 23, 2016

Question:

The specs call for a Single Load Cell platform WIM that is only made by IRD up in Canada. Would the state make an exception to use a Quartz Sensor WIM system?

Answer:

In relation to the use of a single load cell versus another WIM system, the specifications state that the WIM system must be in conformance with ASTM E 1318 Performance requirements for a Type III system. If another WIM system is specified in the bid, then the Contractor shall ensure that the WIM system meets this requirement.
